

Titan Sky: Waste Simplified.

Maximise efficiency, Minimise waste costs.

With ever-tightening environmental regulations, duty of care requirements, and waste tracking obligations, staying compliant has become a specialist job in itself. That's where Titan Sky comes in.

We understand construction waste because we've been dealing with it for years. From major civil engineering projects to smaller building works, we know the challenges you face. The waste streams are diverse – asbestos, excavated soil and hardcore, contaminated soils, mixed demolition waste, timber, metals, plastics, plasterboard, insulation, hazardous materials, and all the ongoing accumulation of packaging, PPE, and site consumables.

Titan Sky provides a complete waste management solution tailored to your project. We'll work with you to understand your specific requirements, set up efficient collection systems, and handle all the compliance paperwork. Whether you're running a long-term infrastructure project or a short-term refurbishment, we'll design a service that fits your schedule and budget.

- Asbestos including surveys, analysis, management, removal, collection and disposal
- Hazardous contaminated soils – kerosene, arsenic, heavy metals
- CoSHH Store collection and removal – itemised, repacked and removal
- Power tools and batteries, transformers, Vapes – all electronic waste
- Shredding and destruction of paperwork, plans, hard drives
- On site bin, even for inner city sites
- Cement and admixture tank emptying, cleaning and wastes produced
- Spillages and site cleanups
- Old tank emptying, cleaning and dismantling/demolition

We can provide one bin systems to keep everything as simple as you need it, you describe what you need the bin for and we tailor the package to suit.

We will come and audit your whole site, might take us a few hours and we will ask questions and look everywhere.

We are compliant, ISO accredited and licensed with the Environment Agency.

We operate our own licensed site, we operate our own vehicles and we have our own equipment.

We do it the right way or we don't do it.

Making more out of your waste, the right way, always.

Reduce → Reuse → Recycling
