

ENGINEERING AND MANUFACTURING

Titan Sky: Waste Simplified.

Maximise efficiency, Minimise waste costs.

Titan Sky has always had engineering at its heart of the waste that we organise, collect and recycle.

We started out collecting oily absorbents and empty containers from an engineering site in Hitchin and through hard work and a commitment to always doing it right we have secured bigger sites and looked after every part of waste that the site produces.

If you are a small business with 25 litres of cutting oil and some old absorbents or a large industrial site with coalescer filters, aerosols or plating solutions then we can offer the opportunity to you for us to manage every aspect for you. Waste isn't complicated if done right and with us helping you its even simpler than you think. Basically its storage and distribution with a technical aspect.

Titan Sky will collect and recycle 100% of what you produce, be it oily absorbents, nitric acid containers, used adhesives, effluent sludge, suds, cardboard, plastic off cuts, WEEE, batteries. Our ethos is to divert 100% from landfill but save you money and our approach is to utilise best available processes as and when they are created.

- Industrial size electronic/WEEE waste , office WEEE waste including printers, microwaves and toners
- Redundant machinery with batteries
- Oil based waste streams such as - absorbents, filters, packaging, soluble oil, hydraulic, transmission, bunds, empty containers
- Underground interceptor tanks - emptied, recharged, cleaned, repaired, installed
- Paint tins , industrial grade chemicals such as hydrochloric, sulphuric, HF, caustic, flammables
- Gas bottles and fire extinguishers including nitrous oxide and acetylene tanks
- Aerosols including expanding foam, MAPP gas cylinders
- General Waste, Cardboard, Plastics, Food Waste, Glass Waste , Confidential Shredding

We can provide UN approved storage containers with lids for outdoor storage of damaged leaking chemicals. Skips for segregated metals for optimal rebates.

We will come and audit your whole site, might take us a few hours and we will ask questions and look everywhere.

We are compliant, ISO accredited and licensed with the Environment Agency.

We operate our own licensed site, we operate our own vehicles and we have our own equipment.

We do it the right way or we don't do it.

Making more out of your waste, the right way, always.

Reduce → Reuse → Recycling
